

**From Trolley Stops to Walkable Blocks, Machine Learning Insights into San Diego's Urban Fabric
Point of Reference for Final Report**

1.	Introduction and Question Answered	
2.	Background Literature	
3.	Python Packages Used	
4.	Data Sources	
5.1	Identifying Study Area with Network Analysis	(Pages 1 - 27)

5.1	Identifying Study Area with Network Analysis (continued)	
5.2	Imageries Scraping with Google API	
5.3	Applying Machine Learning	(Pages 72 - 81)

5.4	Obtaining Walkability Score	(Pages 161 - 165)
-----	-----------------------------	-------------------

5.4	Obtaining Walkability Score (continued)	(Pages 996 - 999)
-----	-----------------------------------------	-------------------

5.4	Obtaining Walkability Score (continued)	
5.5	Interpolating Walkability Values for Unsampled Points	
6.	Statistical Analysis	
7.	Summary of Data Cleaning	
8.	Summary of Product: Adjusted Cost-Distance Map	
9.	Discussion	
10.	Conclusion and Future Work	(Pages 1,086 - 1,106)
